Hydro-massage is a time proven effective therapy for many physical, as well as stress related issues including:

RHEUMA
OSTEOPOROSIS
BACK PAIN
SLEEP DISORDERS
ASTHMA

and many others...

WELLNESS

As time slips by - don't get left behind...

Take control of your personal wellness with your very own MylineSpa. Tranquillity for the mind, body, & spirit. Treat your senses to the delights of a home oasis, far from the stresses and strains of your hurly burly life.

Unique MylineSpa benefits bring the ancient practice of water massage right up to the present day - perfect for that all too rare slice of quality "me" time.

A MylineSpa hydro-massage gently warms and soothes with carefully positioned water jets that easily adjust from a gentle caress to a full-on pummel. Relax, Rejuvenate, and even Rehabilitate damaged, stressed, or just plain old tired you. Enjoy the company of friends, meet the kids again, or just chill out alone with your body and soul – so many choices, so little time....

MylineSpa are specially optimised to provide class leading effective and comfortable massage at an affordable price and low running costs.

LIGHT MY MOOD

Myline Spas all come with built in colour therapy lighting as standard

Did you know that colours affect our moods?
The ancient art of Chromotherapy has been practiced since early Egyptian times and now, our super bright led lighting technology has brought it right into the 21st century.

Based on 4 colours it can be set to a particular colour, or gently fade through the entire spectrum.
Each individual colour will subtly influence our mood, so when used in conjunction with the hydro-massage it forms part of our overall MylineSpa wellness program.

The MylineSpa moodlighting system is based on these 4 colours, each are reputed to help with the particular conditions below.

chronic insomnia, heart problems, upset mental state, skin irritations, high blood pressure

relief of menstrual cramps, function of throat and glands, heart rhythm, pulse headache, toothache

state of depression, stress, rheumatism fever, constipation, asthmatic problems

digestion problems, weariness, depression diabetes, flu, colds, chronic depression

myline
spa

And when your friends arrive for an evening spa party - what better than a full on in-spa light show!

STRENGTH AS BEAUTY

The sculptured soft curves, deep seats, and stretch out legroom of a MylineSpa are more than just good ergonomics and style. The really clever stuff is hidden within the spa shell out of sight where our industry leading technology adds exceptional safety, strength, durability, and longevity to every MylineSpa we sell..

Microban® is an antibacterial material used extensively in plastic kitchenware such as cutting boards to guard against bacteria. It cannot be cleaned away and lasts for the life of the product, and it's also inside all our MylineSpa acrylic shells for the same reason.

Beneath the top surface are 3 more layers of specially formulated high technology polymer coatings to stiffen and insulate each MylineSpa shell. This ground breaking system is so advanced it needs robots to apply it. This produces a super strong, eco neutral, bio degradable, totally safe hot tub shell that will protect both your investment and your family for many years into the future.

Why a MylineSpa shell is better

- Super quiet operation because the sound insulation is actually part of the shell – not just a sprayed on afterthought.
- Industry leading insulation properties, the entire shell system insulates so reducing energy costs and putting money back in your pocket.

One of the industries best shell warranties for years to come..

- Eco friendly – Our Myline shells are ultimately bio-degradable and hazard neutral, we are proud of our lead in producing genuinely clean, green products from Europe's most modern hot tub factory.

COLOUR ME!

STERLING SILVER

PEARL WHITE

SPA SHELL COLOURS

The colour on a MylineSpa shell can never wear or fade as its actually part of the shell itself. An occasional wipe over will restore its lustre and even scratches can be easily removed. Our exclusive and contemporary "Polar" colours will tone with any garden, whether contemporary or traditional.

WEATHERPROOF PLASTIC CABINET

Every MylineSpa comes as standard with our award winning maintenance free cabinet. The simply stunning finish is impervious to environmental attack such as ultra violet, rain, frost etc, just an occasional wipe over will keep your MylineSpa looking as good as new for years into the future.

The European chic of our Driftwood cabinet has been carefully selected to blend with and compliment any garden, whether contemporary or traditional.

SAVING ENERGY

Effective insulation is extremely important to keep running costs to a minimum. Our unique MylineSpa "Reflective Thermal Barrier" (RTB) insulation bounces waste heat back into the plumbing, whilst keeping out the colder outer air. We've even built this system into the spa's cover to reflect rising heat back into the water.

This integrated system means a MylineSpa is exceptionally economical to own. Many spa manufacturers still use discredited spray foam insulation whilst, a few even still mount the spa equipment, actually outside the spa cabinet. These old legacy systems are outdated and expensive to run plus they damage our environment.

The spa heatmap picture here is an infrared image. The person's face is red, indicating a high heat loss, whilst the pastel green and blues of the MylineSpa indicate a very low heat loss as almost all the heat is kept inside the spa and cabinet.

NEW INNOVATION!
More energy saving with the
polyfoam insulation on spa floor
and cabinet inside.

Advantages:
Very long lasting- constant Lambda value.
Safe- non-toxic, non allergen,
no condensation, no bacteria,
clean, odourless material, no smell,
no fogging.
Flexible and light weight material.
Saves resources,
very good insulation properties.
CFC free!

The mylineSpa heatmap

THE SECRET OF LONGEVITY

A house is only as strong as its foundations
- we use the same principle to build a MylineSpa.

1. Reinforced ABS polymer floor pan
The floor pan is the foundation upon which we build our spas. The sides extend 100mm upwards to form a moisture and insect proof barrier. It is completely covered with our RTB insulation to prevent valuable waste heat being drawn out by the "cold sink effect" of damp ground.

2. Cabinet frame
Our unique polymer perimeter frame fits to the floor pan rim and supports the insulated cabinet panels, adding even greater strength and stability to the overall structure.

3. Shell supports
Special pillars support the spa shell and evenly distribute the bather load across our foundation spa base.

These three key components form the integrated build system of a MylineSpa and ensure exceptional longevity and durability for your investment in our brand.

EASY & FUN

Our new spa touch panels make easy work of controlling all the functions in your MylineSpa.

A large screen displays the bathing temperature, and simple fingertip touch pads allow easy adjustment of all the spa's features including temperature, jets, lighting etc.

YOUR CLEAR ADVANTAGE

The MylineSpa's are equipped with filter that provide cleaner water. It prevents the growth of bacteria, and thanks to our antibacterial acrylic you can relax in perfectly clean water. Inactivates harmful microbes particularly efficient, thereby increasing the life of your product.

Filters provide fresh, clean and clear water in an efficient and environmentally friendly way.

MylineSpa Cleaning Tip: Please clean the filter weekly thoroughly strong water pressure!

The MylineSpa multi-stage filtering and conditioning system is designed to provide exceptionally high quality crystal clear bathing water. Our cartridge micro filter removes tiny particles that could cloud the water. We also include a high quality Ozonator for additional water quality.

This device produces Ozone which when mixed with water is a powerful oxidant that helps to destroy bacteria, viruses, and algae that could be present in the water. In addition the microbial antimicrobial material within the shell helps to shrug off contaminants and force them to be drawn into the filter.

Bathing in a hot tub should be safe and fun so each MylineSpa has a comprehensive 5-stage water filtration and conditioning system, carefully designed and optimised for each model.

STAGE 1.

Filtration: Several times an hour all the bathing water is passed through the cartridge micro-filters. Tiny particles that could otherwise cloud the water are trapped and held in the filter medium. Periodic rinsing of the filter is all that's required for repeated re-use

STAGE 2.

Circulation: The pump operates at a very low energy setting during filtration and users can easily set the start time, duration and frequency of cycles—thus optimising water quality for minimal energy costs.

STAGE 3.

Conditioning: Every MylineSpa model is equipped with a high quality Ozonator as standard. This device generates Ozone (O_3). When mixed with water, Ozone becomes a very effective oxidiser, killing any bacteria, viruses, and algae. After filtering, all the water is treated this way, which dramatically improves its quality as a result.

STAGE 4.

Microban™ spa shell: Once the filtered and conditioned water is returned to the spa basin, any new build up of contaminants that try and adhere to the water line are shrugged off by the anti-microbial properties of the Microban™ within and are therefore drawn easily back into the filter for removal and treatment.

STAGE 5

Sanitation: As with all spas a suitable sanitizing agent must be regularly added to the spa water for safe bathing. Your dealer can advise you on this.

INNOVATION BY DESIGN

mySEAT™ - for Man&Woman

No more sliding down the lounge bed because the footrest is too far away! Our exclusive MylineSpa mySEAT™ lounge has subtle additional heel rests in just the right place so everyone is comfortable.

myJETS™ – neck and shoulders massage jets

We've designed in special downward facing neck and shoulder jets for the ultimate stress relief massage. Each contour of this intensive massage seat matches your body shape so that every one of the many jets provides a perfect hydro-massage experience. Each seat in a MylineSpa is equipped with a different jet arrangement so everybody can find their favourite.

Using a MylineSpa is fun for everyone, but our designers also take the therapeutic benefits very seriously too. That's why we've added some clever innovations to our massage jets.

myHIP™ jets

These exclusive myHIP™ jets are in just the right place to assist in breaking down body fats around the hips and toning the soft tissues. Their hydro-massage can also be beneficial in helping rehabilitation following hip injury or surgery.

ACCESSORISE

**Spa Bag**

The insulated Spa Bag provides protection from the weather and UV radiation, so keeping your spa in great condition between uses. It will also reduce heat loss and electricity costs during the colder winter months.

**SpaRail**

The spa mounted SpaRail offers additional access safety and convenience for young and old.

**Filter**

Regular cleaning of your spas filter will extend its life but they should be replaced periodically to ensure optimum performance and perfect water quality.

**SpaUmbrella**

With this elegant SpaUmbrella you can enjoy your hot tub any time, regardless of whether it is raining, snowing or sunshine.

The foot of the base simply slides underneath the spa.

**Cover lifter**

Makes removing the spas thermal cover easy for anyone to do on their own and conveniently stores it at the back of the spa, protecting it from damage.

**SpaCaddy**

The SpaCaddy rotating tray is sturdy and versatile so now the snacks, drinks, and more can be placed easily within reach.

**myStep**

With its wide tread of 90 cm and its weight capacity of more than 300 kg, the MylineSpa Step makes access easy.

**New SmartPhone™ application with WiFi connect!**

Take control of your spa anywhere at anytime. Sit back and enjoy the all new Spa Application for your SmartPhone™. Set the temperature, heat mode, lights and pumps all with a single touch.

**Handrail**

An extremely sturdy floor mounted handrail suitable for hard floors and concrete spa surrounds.

**Spa Step**

The Spa Step makes getting in and out of the spa safer and more convenient.
